
MetroStar Systems saved approximately 6 months of development time by choosing PSPDFKit over other frameworks available on the market.

MetroStar Systems is the leading provider of IT, Web, and Creative Services for the federal and commercial sectors. Their eBriefing app is the first and only electronic briefing book designed to streamline the way business intelligence is generated, organized and delivered. For more information, see <http://eBriefing.MetroStarSystems.com>

THE REQUIREMENT

eBriefing wanted to modernize and mobilize its state-of-the-art paperless document management processes.

The goal of MetroStar Systems when constructing eBriefing was to create an electronic document management system that offers users a unique reading experience, as well as easy editing and sharing of documents.

In order to accomplish this goal, MetroStar Systems was in need of a solution for viewing and editing PDFs on the iPad. The requirements were the following: intuitive user interface, data presentation as if it were on a printed page, full-text search, ability to annotate text with a pen, capacity to mark pages and documents as “favorites” and to bookmark pages for easy access. They also have a strong focus on security and required a fast and transparent file decryption for their content.

“We had researched for a long time and PSPDFKit was the only tool that provided everything we wanted”, Brian Lee, iOS Expert at MetroStar Systems

HOW PSPDFKIT HELPED

Great search functionality, Xamarin Bindings and easy PDF merge functionality

“What we like about working with PSPDFKit? For the purpose of eBriefing, we had to merge multiple PDFs together as one PDF and show it as a book. PSPDFKit was the only tool that did the merge for us within no time.

Also, PSPDFKit supports Xamarin Bindings, which is a huge benefit since we’re developing eBriefing iOS with Xamarin Studio.

What we like most is definitely the search functionality! eBriefing is available on Android and Windows platforms too and I know how much time our developers spent to support search functionality on these platforms”, Brian Lee, iOS Expert at MetroStar Systems

COMPANY

MetroStar Systems -
eBriefing.MetroStarSystems.com

PRODUCT

eBriefing - electronic briefing book, document management

CUSTOMERS

governments and enterprises

The leading framework for displaying and annotating PDFs in your iOS apps.
