For Box, extensive support for PDF documents on the iOS platform went from being a separate project to simply downloading the newest framework version. Thanks to PSPDFKit.

Box Inc. is an online file sharing and cloud content management service for businesses. For more information, see www.box.com

THE REQUIREMENT

Implementing robust PDF file support with the quality and polish customers have come to expect from Box

Since the beginning, the goal for Box has been to make businesses more productive and collaborative. Box connects employees with their information, wherever they are, in a fast, powerful and easy way.

When it comes to displaying and managing PDFs, Box wanted a framework that met their high quality standards. It had to be fast, even when handling large documents, powerful and easy to use - to give customers the experience they deserve and that they're expecting from Box.

For the development team, it was important that the framework was simple to use, had excellent documentation, and was highly customizable. With these requirements in mind, Box started to compare different PDF frameworks available in the market ...
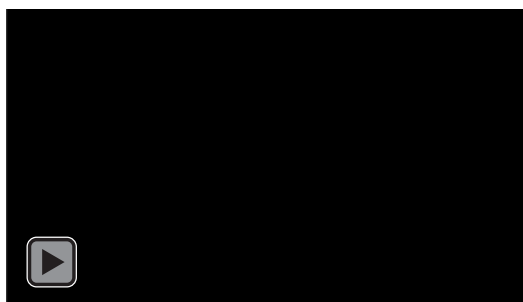

HOW PSPDFKIT HELPED

Easy to use, great user interface, great customer support

... and ended up with the perfect solution: PSPDFKit!

"What we really appreciated with PSPDFKit was the polish of this product. A great amount of time has been spent on details in the user interface and the transitions, as well as in the documentation." – Martin Destagnol, Head of Mobile Engineering at Box.

"We really appreciated how responsive the PSPDFKit team has been with our feedback. PSPDFKit is a great solution. It's easy to use, and includes timely and helpful customer support." – Mallory Paine, Head of iOS at Box.
